DESKTOP USER GUIDE

**Join us in revolutionising Freemasonry for the digital age
with our membership app!**

**Your participation and feedback are crucial. Together,
we're creating a tool that will significantly enhance the
Masonic experience for years to come.**

**This is your chance to play a pivotal role in the success of
this exciting project.**

Portal is the new membership app for UGLE. It aims to coexist with and eventually replace Hermes and Adelphi by incorporating their functionalities into a unified system. This project will roll out in phases, ensuring that members' data is accurate and up-to-date, while improving user engagement through an intuitive interface.

This presentation aims to provide an overview of the membership app interface and its uses.

The new membership app will be accessible through both a mobile app and a website. Although some features may be limited to the web platform for administrative users, the goal is to ensure that most functionalities are available to all members on their phones.

How United Grand Lodge of England manage your data

Portal introduces enhanced **privacy controls**, enabling individuals to manage who can view their personal data within their profiles.

Users can adjust visibility settings for various elements, such as contact information and photos, at the Lodge/Chapter, Provincial/District, or global level.

Overall, **the membership app aims to give users greater control over their data privacy.**

How is my data held?

Note: this is an overview showing common data flows, for more detail please see the full data protection notice.

① By default, your email address and postal address will be visible but your telephone number will not. You can change your preference at any time.
